

# Sylvia & Gary Green

I gave up my full time accountants job, after the birth of our second daughter in 2003. I then became a registered Childminder and although I really enjoyed the job, the income was very unpredictable. In May 2007 a Kleeneze catalogue came through the door and after ordering some products I noticed a note inside about earning an extra income.

I sent for the information and decided to give it a go. My husband Gary, who also works long hours, as a Manager at a forklift truck company, was more than a little sceptical about the whole idea but supported me 100%. We now work the business as a family team with our two girls, Samantha 9 and Taylor 5. They love helping with the catalogues and doing all the activity.

After attending some meetings and seminars that are an absolute must, if you are serious about giving your family the financial future they deserve, we can now see that by working the business smart and helping others to do the same, by following the simple system that is in place, we in turn will get the things we want.

In February this year we sat down with Dave & Angie, our success line, and set a five year plan to go Gold and beyond this year. We set the actions in motion that were needed to move us forward in the business. We increased our activity and set about team building. We offer our team all the support they need and help them follow the system to achieve their goals and dreams.

We have now qualified as GOLD Distributors and are so excited at reaching our first goal on our five year plan.
